

We are proud of our Smart City home: Orlando, Florida

## We are ecoPreserve

This is the work we do,  
the people who accomplish it,  
and the projects we've completed

## WHAT WE DO

We transform organizations with sustainable solutions to achieve resiliency, prosperity, and wellness.

## INTRODUCING 360° RESILIENCY

ecoPreserve brings building efficiency, support materials management, maximize human factors and engages teams in smart workplace solutions.

### Facilities Plus

We work with organizations in many different industries to drive government and corporate sustainability best practices in construction, maintenance, energy management and building certifications.

### Resource Lifecycle

We help large organizations and municipalities improve operations, reduce costs, and achieve *Zero Waste* through efficiency-focused planning, program development and implementation.

### Smart Workplace

ecoPreserve offers organizational programs to promote health and safety best practices and to optimize work environments. From office to industrial settings, we conduct facility assessments, develop system recommendations and facilitate health and safety training.

### Peak Performance

We develop, document and implement onsite and offsite training on a wide range of environmental and sustainability topics. Our custom training programs promote individual and organizational best practices across many industries, government and corporate environments.

## PARTNER WITH US!

- Experienced, credentialed professionals (PE, AIA, CIH, PMP, LEED AP, JD)
- Certified MWBE/DBE/LBD/EDWOSB
- Active involvement with critical stakeholders (FAA, EPA, DEP, DOT, USDTA, USGBC)
- NAICS Code 541620 – Environmental Consulting Services

### ALEXA STONE, PRESIDENT

Since founding ecoPreserve, LLC in 2009, Alexa has formed a team of experienced environmental services professionals that consistently delivers resiliency through building efficiency, materials management, human factors, and team engagement. Always looking ahead, Alexa advocates for Smart Cities strategies locally and globally. Those initiatives include participation in an environmental action task force, appointed by Orlando Mayor Buddy Dyer, that has developed a Green Works Orlando plan. An internationally-recognized speaker and educator, Alexa shares her knowledge and commitment to energy-efficient construction and human factors engineering at national and international conferences.

Certifications: LEED AP O+M, Sustainable Facility Professional™, ENV SP

### Mital Hall, Facility Operational Efficiency

Mital brings cost-effective and sustainable solutions to each project and every client. She champions continued process improvement, develops sustainability policies, and initiates green team activities and reporting. Mital also oversees third-party green building certifications, verifies ISO compliance, and administers energy efficiency programs.

Certifications: PMP, LEED AP O+M

### Jessica Wright, Solid Waste Management

Jessica leads ecoPreserve's Resource Lifecycle services with expertise in *Zero Waste*, sustainable purchasing and waste minimization. Her specialized material composition evaluations result in increased diversion rates, cost savings and employee engagement. She brings an authentic commitment to corporate responsibility, community education and human empowerment.

Certifications: LEED Green Associate, Florida Water AP

### Michael Kuk, Auditing and Commissioning

For over 25 years, Michael has commissioned more than 100 new and existing buildings and performed energy efficiency studies on hundreds more, including over 90 Certified to Platinum LEED projects. His cost-reducing energy management services include auditing, rate analysis, Energy Star® Benchmarking and specialized HVAC analysis.

Certifications: PMP, LEED AP O+M

### Sarah Hamoui, Certifications and Compliance

Sarah opened ecoPreserve's Atlanta office where she contributes to project development focused on Indoor Environmental Quality improvements. Sarah works alongside project managers assisting Orlando International Airport's achievement of LEED certification.

Certifications: LEED AP BD+C, ENV SP

### Alberto Brioso, Health and Safety

With 20 years in the environmental safety and health profession, Alberto bears a deep understanding of the synergy between sustainability and health. He has worked in both the public and private sectors with extensive experience in safety and health consulting. Alberto has performed hundreds of indoor air quality assessments including LEED projects.

Certifications: CIH, EHS, LEED AP BD+C, MSC

### Jeff Benavides, Energy and Renewables

Jeff is a proven energy and sustainability professional with project management and strategic consulting experience in over 25 unique corporations, organizations and task forces. Jeff manages various green building certification projects and organization wide programs including achieving LEED Existing Building Certification for the 2<sup>nd</sup> largest convention center in the world.

Certifications: LEED AP O+M, GGP

### Jennifer Webb, High Performance Design

Jennifer has nearly 20 years of experience as a senior level architect and project manager for educational, healthcare, scientific and commercial projects. Her experience reaches through every project phase including planning and design, construction and close-out. She has managed large and multi-disciplined teams in numerous public and private programs.

Certifications: AIA, LEED AP BD+C

### Rains Vickery, Construction Management

Rains assists in LEED BD+C and LEED O+M project management, documentation, development, and submittal as well as ongoing sustainability services for the Orlando International Airport. She graduated from the University of Florida with a BA in Sustainability and the Built Environment.

Certifications: LEED AP BD+C, Florida Stormwater, Erosion, and Sedimentation Control Inspector

## SAVING UTILITY COSTS, REDUCING WASTE, AND PROMOTING WELLNESS

Leading regional and national organizations trust ecoPreserve to bring about long-term cultural change through data-driven planning, policy development, and implementation.

### AVIATION

*Orlando (MCO):* New Transit Facility LEED Certification • Terminal Expansion Sustainable Design Services • Corporate Sustainability Reporting • Aircraft Rescue and Firefighting Ergonomics Program  
*Dallas/Fort Worth (DFW):* Solid Waste Management Program

### GOVERNMENT

*Orange County Convention Center:* LEED Certification & Recertification • Employee Engagement Programs • *U.S. Army* Feasibility Analysis of Facility Operational Efficiency • *Department of Defense* Construction Management and LEED Certification at 3 Technology Facilities

### HEALTHCARE

*Dr. Phillips Hospital:* Sustainability Program Management • LEED Services • ENERGY STAR Portfolio Management  
*Florida Hospital:* Environmental Stewardship Program • Solid Waste Management • Employee and Contractor Training

### UTILITIES

*Orlando Utilities Commission:* Sustainability Analysis & Reporting • LEED EBOM Feasibility Analysis • ASHRAE Level I Building Analysis and Building Operation Plan • Thermal Comfort Survey & Analysis • Building Management Systems Report

### COMMERCIAL

*Bright House Networks* Energy & Sustainability Management Plan • *Highwoods Property Management* Sustainability & Certification Services • *500 Town Park* LEED BD+C Certification Services

### EDUCATION

*University of Central Florida:* Sustainable Program Development and Implementation • Campus Wide Operations & Maintenance Analysis • Sustainability Policy & Contract Review • Industrial Hygiene Services
